Workshop Title: Reimagining education for the 21st Century

Convener's name, organisation : Philip O Brien, Salève Foundation

Main issues, questions discussed:

- Education system is the same for 100 years.
- Reflexion in terms of skills and qualification.
- Use of AI in schools.
- How can we ensure that the technology is use in good way specially for kids?
- Education and training for change.

Conclusions:

Maybe go more in the direction of project-based approach.

And curriculums should be developed by those who have or are participants

Competencies, such as critical analysis, communication, collaboration, and digital management will be as important in the future as are skills

Education in the early years fostering those skills, and is child led (eg the Montessori method)
